

Tables That Can't be Topped

Ambiance. Apart from the food, it's perhaps the most important aspect of a quality dining experience. Sometimes, as in the case of theme restaurants, it's even more important than the food. Little wonder then that restaurants grand and small go out of their way to create a unique atmosphere. They decorate the walls, line the floor with props, and hang objects from the ceiling. All too often though, an opportunity is overlooked.

The tabletop where diners spend their time.

Wilsonart Custom Laminate makes uncommon tabletops possible. Artwork, logos, and full-color graphics can be added to enhance a restaurant's atmosphere. Designs won't stain or wear off because they're protected by a smooth, solid finish that's easy to clean and extremely durable. Any of three production processes can be used: Seamless Inlay, Silk-Screen or Graphic Image.

Seamless Inlay For a Crisp, Clean Look

Adding custom artwork, type or even simple logos to laminate doors used to be a tricky affair. Not with our new Seamless Inlay Process. We can take a custom-designed stencil pattern and create a seamless sheet of laminate from it.

- No seams for water and dirt to penetrate.
- Laminate surface makes for easy maintenance.
- Seamless Inlay uses two sheets of contrasting paper instead of ink.
- Can combine practically any of our 250 Wilsonart® Laminate colors and designs.
- Woodgrains combined with marble inlays create an elegant look.

Silk-Screen Process For Complex Designs

If you want to add a more intricate design to your doors, or if you have a design that entails multiple colors or requires exact color reproduction, then our Silk-Screen process is for you. Here a design is screened directly onto a sheet of decorative paper, which is then made into a laminate surface.

- Delivers bright, detailed graphics.
- When printed on light colored decorative paper, images really "pop".
- Color-matching can be carefully controlled.
- Finished appearance is a crisp, clean look with no seams.
- Water & dirt can't penetrate.
- Laminate surface remains easy to clean because water and dirt can't penetrate.

Graphic Image For Photo Realism

When impact is everything, you should consider our Graphic Image process. We can take full-color photographic images or original artwork, scan them into a computer and transfer them onto decorative paper. Then we turn them into smooth laminate surfaces which create breathtaking tables.

- Amazing dimensionality gives life-like quality to images.
- Able to reproduce any full-color image.
- Can even simulate fabrics, wall coverings, woodgrains and Italian tile patterns.
- As durable as standard laminate.
- Sealed protection from dirt, water and ordinary household chemicals.
- Can be cleaned with a damp cloth.
