

Wilsonart® Laminate Awarded GREENGUARD Indoor Air Quality Certification

The GREENGUARD Environmental Institute™ has awarded its GREENGUARD Indoor Air Quality Certification to Wilsonart high pressure laminate. All Wilsonart Laminate product types were tested, and will continue to be tested, under the stringent GREENGUARD Standards for low-emitting products.

What is GREENGUARD?

The GREENGUARD Environmental Institute™ (GEI) is an industry-independent, non-profit organization that oversees the GREENGUARD Certification Program for low-emitting products, including the establishment of acceptable standards for interior products and testing protocols. The GEI's mission is to improve public health and quality of life by helping manufacturers build better and safer products and to provide the public with a free indoor air quality resource and guide to readily available low-emitting products. The GEI oversees the certification process, including all audits and qualifying criteria for each product and product category. You can learn more about GREENGUARD by visiting their website (www.greenguard.org).

Why is the GREENGUARD Certification important?

The GREENGUARD Certification of Wilsonart Laminate gives independent assurance that Wilsonart

high-pressure decorative laminate products have minimal impact on the indoor air environment. Ongoing tests by GREENGUARD ensure that the level of emissions from substances such as formaldehyde are well within recommendations set by the WHO, OSHA, the USEPA, and other internationally respected public health organizations. This issue is becoming more and more important to consumers and building/design professionals who are concerned about the quality of the air inside their homes and work places.

Where is the GREENGUARD certificate?

Go to www.greenguard.org and register (you won't receive junk email or other annoying correspondence from them by registering). The certificate can be printed from the "Find Products" area. Wilsonart Laminate product types are listed under the "General Construction Materials" category.

Wilsonart International
Chemsurf Chemical Resin/Laminates

Emission and Category	Certification Details
Category: General Construction Materials	Certification No: FGLS1311-1
Type: Surfaces	Certification Period: 01/2014 - 01/2015
	Certification Restrictions: 12312E

This product has been GREENGUARD Indoor Air Quality Certified by the GREENGUARD Environmental Institute under the GREENGUARD Standard for Low Emitting Products.

GREENGUARD Indoor Air Quality Standard for Low Emitting Surfaces Products

GREENGUARD Indoor Air Quality Certified Surfaces Products meet the following maximum emission requirements:

Individual VOCs	≤ 0.1 TLV
Formaldehyde	0.05 ppm
4-tetrahydrocannabinol	0.005 mg/m ³
Total VOCs	0.5 mg/m ³
Total aldehydes	0.1 ppm

Listing of measured carcinogens and reproductive toxicants identified by California Proposition 65, the U.S. National Toxicology Program (NTP), and the International Agency on Research on Cancer (IARC) must be provided.

Any pollutant not listed must produce an air concentration level no greater than 1/10 the Threshold Limit Value (TLV) industrial workplace standard (Reference: American Conference of Government Industrial Hygienists, 6500 Glenway, Building D-7, Cincinnati, Ohio 45211-4438).

*Any pollutant regulated as a primary or secondary outdoor air pollutant must meet a concentration that will not generate an air concentration greater than that prescribed by the National Ambient Air Quality Standard (U.S. EPA, Code of Federal Regulations, Title 40 Part 50).

Which products are tested?

- ❖ Wilsonart Laminate
- ❖ Chemsurf
- ❖ High Wear
- ❖ Fire-Rated
- ❖ Metal Core
- ❖ Solid Phenolic Panels
- ❖ Custom Laminate
- ❖ Backers
- ❖ Wilsonart Decorative Metals
- ❖ METALAMINATES
