## WILSONART® DECORATIVE METALS

### PRODUCT DESCRIPTION

Wilsonart® Decorative Metals are designed for vertical interior or ceiling applications where a special accent is required or a special mood is desired.

### PRODUCT COMPOSITION AND AVAILABILITY

#### Type 401

A-Look Mirror Quality Decorative Metal panels consist of two thin skins of aluminum alloy continuously bonded to a thermoplastic core, then electroplated in a chrome or bronze finish. EX is suitable for exterior applications.

#### Type 414

A 26-gauge steel sheet featuring a Galvalume® finish. The steel is coated with an aluminum-zinc alloy with a clear acrylic coating both sides. The metal

features a decorative faceted finish on both sides – usable 2 sides (protective film applied one side only). **Steel fabrication tools are required. Facet size may vary.**

#### Type 416

Artisan Group non-anodized aluminum alloy panels feature textured designs in three patterns applied from border to border, creating a dimensional appearance. Panels are coated with a clear polyester resin to prevent oxidation and protect the beauty of the design.

#### Type 418

Anodized and decorative aluminum (Types 419 & 416) are bonded to a phenolic backer for fabrication following **HPDL techniques for flat surfaces only. NO EDGE TRIM OR STRIPS.**

#### Type 419

A solid sheet of aluminum is produced with a decorative, anodized finish and color. The other side is prepared to facilitate bonding to a suitable substrate. (Keep this surface free of grease, oil or other contaminants.)

### BASIC LIMITATIONS

All decorative metals are designed for interior applications. Only A-Look Mirror Metals with an "EX" designation and Galvalume Steel are recommended for exterior applications. **Horizontal applications are not recommended.**

### FABRICATION AND ASSEMBLY

For comprehensive fabrication instructions, consult the Decorative Metals Fabrication Manual (BR0406).

## WILSONART® METALAMINATES™

### PRODUCT DESCRIPTION

#### TYPE 408

METALAMINATES™ from Wilsonart are manufactured with an aluminum foil

that's thermally fused to the phenolic backer, giving METALAMINATES the brilliance of metal with the workability of high-pressure laminate. Perfect for postforming in unusual applications such

as column wraps, store fixtures and even furniture. METALAMINATES is the marriage of pure metal and laminate.

Finishes: Polished/Anodized, Brushed/Anodized, Brushed/Epoxy and Satin/Anodized.

A wide array of colors: Gold, Iron, Natural, Pearl, Copper, and Bronze.

Decorative strips are available to complement and enhance casework, furniture and fixtures.

Phenolic back standard with no upcharge. Use with both water- and solvent-based adhesives.

Ideal for postforming or cold forming. Fabricates easily with laminate fabrication tools.

Protective film applied to all METALAMINATES sheets and decorative strips.

### TECHNICAL DATA AND WARRANTY

Please visit [www.wilsonartlaminate.com](http://www.wilsonartlaminate.com) for complete technical data, product availability, care & maintenance, and warranty information.

Wilsonart® Decorative Metals and METALAMINATES are **GREENGUARD®** Indoor Air Quality Certified.
